

VRAXA

VRAXA.com

excited to show you the new
STANDARDS of REALITY & CREATIVITY

World wide presence

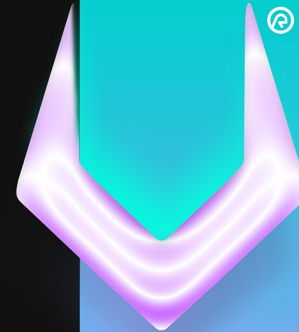

Started on 2014 from Australia with a humble production studio specialised in interactive visual effects and 360° VR production to be on 2020 an international well established group supporting worldwide clients, events & agents providing a diversity of services and solutions.

What do we do

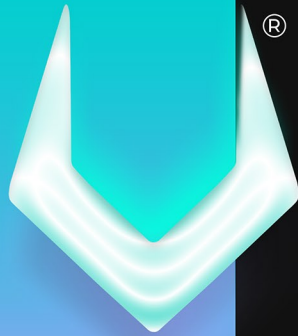

We push the boundaries of what's possible and build our own boundaries of what's not possible, converting an idea, concept, event, game, project to reality that you can experience and enjoy using our expertise and equipments.

VRAX Reality Standards are not really the usual standards but hybrid reality that immerse anything into metaverse or virtual reality as well as 3D environment.

AI & CG

INTELLIGENCE
OF GRAPHIC

It is the new era where technology has its own intelligence to serve you better than humans so we mixed the CG computer graphic with AI.

VR INTERACTIVE videos & 360° production

Our Virtual Studios are located in many countries to meet our clients expectations and deliver faster all VR/XR and 360° interactive videos .

Our studios are equipped with latest cameras and VR systems and trackers to guarantee the best VR production quality with latest technologies such as motion capture for creating the fully immersed VR/XR movies replacing real human movements by 3D characters rendering.

We care about our output quality that's why we keep improving our tools and materials including cameras, drones, post-production tools.

VRAXA had enough years of experience to shoot any kind of videos for any subject under any conditions with best quality in best time frame.

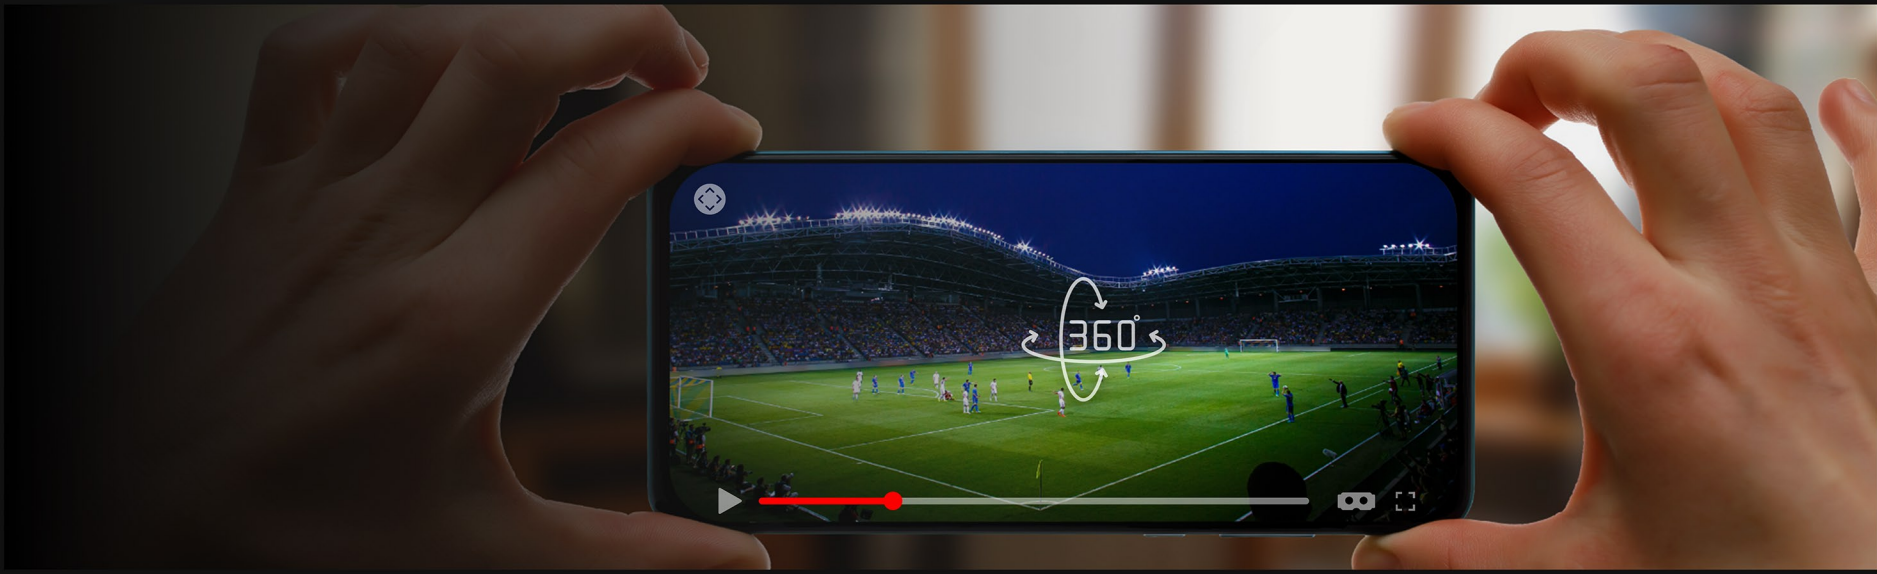

Yes EXACTLY! It is a video and yes it is interactive and yes it is 360° with 8K resolution, you can watch and get full information and knowledge about any element in the video simply by clicking on the spot like an interactive library between your hands. VRAXA softwares and equipments are available anytime to scan your space and create an immersive 360° video and add all elements you wish to come up with a breath taking smart and interactive video to be watched on mobile, computer and VR Headset.

METaverse VR 360° INTERACTIVE

We create award winning 360° virtual experiences that provide you with the perfect tool to increase your location, product and event exposure and captivate your audience and clients. Our 360° virtual development & services are a proven method got a unique ability of gathering people within the space you want to promote, increase trust & support your business internationally. Vraxa Software and equipments are capable perfectly to create a unique VR interactive immersive experience merged in Metaverse to outstand your project, product and your business to unusual horizon where clients can interact with all your products or meet you virtually together in specific location, designed space and external elements like 3D elements, videos, images, text, audio, web frame and much more .

360° VIRTUAL TOURS give users the option to interact with an environment such as a real estate, showroom, hotel, hospital, university, office and so on. VRAXA produce fully interactive and immersive 360° virtual tours for you to let your clients become fully immersed in an environment feeling like they are already there. Whether you want to showcase your property or business, we can take you to the next level of interactivity by providing you a link where your 360° tour is hosted to share it on social media.

INTERACTIVE LED SCREEN

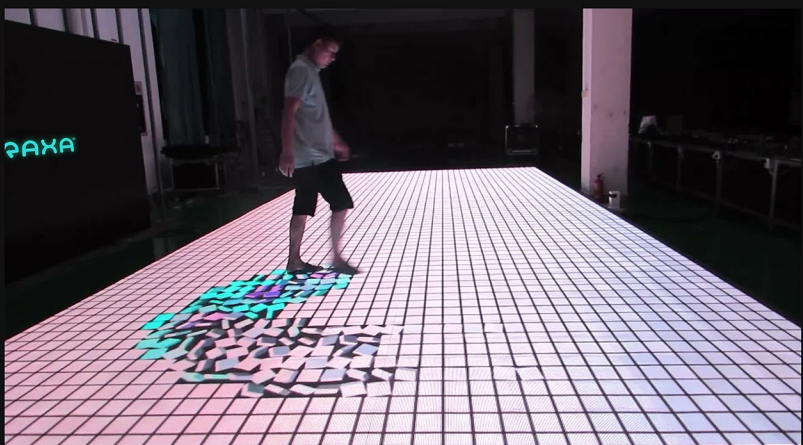

led screens & projection

We create one of a kind experiences that instruct, enthrall, and astound using both real-world and digital components. The unique array of interactive technologies we offer to our clients, who come from a wide range of industries around the world, breathe life into family entertainment centers, schools, museums, events and more. We are committed to giving our customers unique experiences to ensure they have the experience they desire, all of our products can be customized in terms of both content and scale as well make it interactive for a better experience.

Along with concept design, project management, game design, content and software development, interactive technologies and installation, we also design and construct unique projects from scratch. Using LED Screens, Projectors, Sensors, Motion Trackers, Lighting trackers and much more of high tech to create for you and your event or project what is unusual with fully immersive interactive digital room or interactive wall and interactive floor. (all is possible with VRAXA)
